

Experience seamless PCR sampling, preparation, and storage with this specially curated bundle.

**Fisherbrand Mini Centrifuge (16617645)**

This compact centrifuge offers user-friendly features such as tool-free SnapSpin rotors, quick-spin options, a braking function for quick stops, and a weighted rubberized base for stability and noise reduction.

**Fisherbrand Mini Vortexer (17871672)**

Small footprint Vortexer offering maximum vortex shaking for a variety of tube sizes. A simple touch start operation allows for immediate sample mixing with one hand and automatic stop when tube is lifted.

**Fisherbrand PCR Cooler (16320412)**

Ice-free cooling system for PCR preparation and storage. Cools industry-standard PCR tubes, strips, and plates with efficiency. Maintains the entire 96-Well plate at a temperature of 0°C for over an hour and keeps samples below 5°C for up to three hours. Vibrant color change signals to user when temperatures exceed 6°C.

**Fisherbrand 96 Place Storage Rack Low Temp (15758177)**

These Low Temperature PCR Racks have a rotating sliding lid that doubles as a stand, providing convenience and stability. The translucent lid is specially designed for rapid cooling and quick sample identification. With ergonomic finger grips and a robust ABS base, these racks ensure secure handling and sample safety. Available in multiple colors for lab coding.

**Fisherbrand Silicone Lab Mat (15837944)**

This FDA food-grade silicone labmat is suitable for various laboratory settings, including cold rooms, clean rooms, and sterile suites, where high sterility is essential. Effectively safeguards countertops from temperatures up to 200°C (392°F) and demonstrates general chemical resistance to moderate oxidizing chemicals.
