KIMTECH™

Kimtech™ A5 Sterile Hood

Features **CLEAN-DON™ technology** for simpler aseptic donning

Made from **low-lint, breathable SMS material** with a cloth-like feel

Comfortable, secure fit

Kimtech™ A5 Sterile Hoods feature advanced CLEAN-DON™ technology for simple, safe and efficient sterile donning. The aseptic gowning technique saves time while reducing the risk of contamination, and the hoods are suitable for use in EU GMP ISO 5 Grade A sterile cleanrooms.

A highly visible blue line on the inside of the hood indicates the correct place to grasp for aseptic gowning. The hood is folded inside-out to avoid contamination, with pull down ties on the back to assist gowning. The sterile cleanroom hoods are made from high performance SMS material which has a cloth-like feel. This low-lint fabric features high-strength bound and triple-stitched seams and adheres to Helmke Drum test Category I.

The hood elastics provide a comfortable, secure and universal fit, and they are provided individually vacuum-packed for added sterility assurance. This efficient packaging is also designed to reduce space so more products can fit into gowning area storage.

KIMTECH™

Kimtech™ A5 Sterile Hood

With Ties

With Integrated Mask

Key Features

- Features advanced CLEAN-DON™ technology for fast, simple and compliant aseptic donning
- Comfortable hoods are provided in a universal size and are made from low-lint breathable SMS fabric with a cloth-like feel
- Contamination protection is ensured through high quality, sterility assured material with high-strength bound and triple-stitched seams
- Individually vacuum-packed

Assured Compliance

- PPE Cat III according to Regulation (EU) 2016/425
- Type 6 (PB) EN 13034 limited chemical splash protection certified
- Certificate of Conformance and Certificate of Sterility by lot available online

Quality Standards

- Suitable for EU GMP ISO 5 Class A sterile cleanroom environments
- Manufactured in accordance with Quality System ISO 9001
- Sterility Assurance Level 10^{-6}
- Particle cleanliness level Helmke Drum test Category I
- Sterilisation in accordance to ISO 11737-1, -2

Applications

- EU GMP ISO 5 Grade A
- Aseptic Processing
- Parental Drug Manufacturing
- Biotechnology
- Pharmaceutical Compounding
- Ophthalmic Product Manufacturing
- Aseptic Hood Work
